SUBJECT INDEX

Figures refer to abstract numbers. In addition to generally accepted abbreviations, the following have been used throughout the Index: A audiometry; AC air conduction; BC bone conduction; CLP cleft lip & palate; COM chronic otitis media; ECOG electrocochleography; EMR educable mentally retarded; F frequency; H hearing; HA hearing aid; HI hearing impaired; HL hearing loss; IE inner ear; L laryngeal; M muscle; ME middle ear; MR mentally retarded; N nerve; OE outer ear; OM otitis media; RT reaction time; SES socioeconomic status; SOM serous otitis media; SP speech; T threshold; VC vocal cords; VI visually impaired. Other abbreviations in secondarily indented columns refer to word(s) immediately preceding in primarily indented columns. Where reference to animal experimentation would not otherwise be obvious, that entry or number has been set in italics.

Acoustic Trauma (see Noise)

Adaptation

- cerebellopontine tumor, ab-normal in 242
- central involvement 1
- of compound N VIII responses 29
- & far-field ECOG 1948
- & iris pigmentation 16
- & loudness balance 985
- 1. perstimulatory 945
- & midplane localization 985
- monaural loudness adaptation at low sensation levels 1930
- neurotic subjects, in 231
- noise band effects on contralat-eral pure tone 127
- perception, in role of 5
- retrocochlear components in 867
- SISI test & 1108
- effect of on 1075, 1076
- SP range, monaural auditory in 997
- stapedius M paralysis, in 1226
- suprathreshold, perstimulatory 2704
- tests for 2704

 intonation, acoustic analysis of 238
 L position & discrete vocal F change, vertical 1484
 L F, statistical analysis of 614
 laryngoplasty, following 709
 loudness, pitch & role among children 617
 maleness & femaleness in, perception of 2525
 parameters for following laryngectomy 2487
 phonetic means in speakers 2976
 pitching of, spontaneous 1486
 rehabilitation, new techniques in 2493
 sex identification, speaker 2554
 shimmer in sustained phonation 3067
 singers, vertical larynx positioning in 1485
 s., optimum F & pitch range for 1482
 s., vocal F 1485
 s., v. parameters in trained & untrained 1481
 s. voice, problems of 782
 teflon to lower pitch 1625
 voicing contrast, development of 2291
Voice Disorders (see also *Pathology, Speech*)
 acoustic analysis for 3008
 alto female singers, in 3024
 aphonia, psychogenic 1576
 assessment forms 3066
 a. of severity 3012
 clinical management of 2473
 cricoarytenoid gouty arthritis 2502
 Down's syndrome, in 2504
 dysphonia 707, 713, 2502
 d., acoustic reflex characteristics in 2597
 d., hormonal 2506
 d., juvenile 2506
 d., pathogenesis of functional 780
 d., psychogenic 1576, 3063
 d., (review), spasmodic 1678
 d., spastic 1654, 3063
 d., thyroplasty for 2417
 esophageal SP vs artificial larynx 1662
 e.SP, intelligibility of 1422
 e.SP & intraoral air pressure 2505
 e.SP, phonemic errors by listeners, pattern of 3070
 e.SP, pitch in 2503
 evaluation, objective 1566
 falsetto, postmutational 1679
 hoarseness 704, 708, 1619, 2502
 h., acoustical analysis of 2392
 h., cylindroma, in 1597
 h., differential diagnosis of 781
 h., following irradiation 784
 h., intubation, from 1594
 h., medullary thyroid cancer, in 3027
 h., & rheumatoid VC modules 1591
 hypernasality, unexpected remission of 725
 inhibition, vocal 1576
 intubation, following endotracheal 699
 L. stenosis, following surgery for 3028
 laryngectomy, following partial 785
 larynx, following blunt trauma to 772
 nasality, acoustic correlate of 788
 n. & dermatomyositis 1599
 nodules, in children with vocal 3068
 objectification of voice changes 786
 Parkinson's disease, in 2508
 pathology (text), voice 3064
 pharmacological treatment for 1410
 radiation for L C, following 784, 787
 stress in children, vocal 1571
 use, from faulty 704
